

EPM2021 conference

Conference Program

Riga, June 14-16, 2021 (Online)

Message from the organizers

We are delighted to organize the 10th Electromagnetic Processing of Materials conference. Organization process of this event was not easy, and we were forced to change concept of the conference several times and finally came to the solution that conference will be held fully online. Of course, such format has limitations, but we believe that it was better decision than to cancel the conference completely or to move it to the next year. We have received around 70 abstracts, which is sufficient cover three conference days.

We are looking forward to meet You in the EPM2021 conference.
